

John Burton Hotchkiss

Educator and Advocate

Quote: ..."the deaf teacher has from the start special knowledge of the peculiar difficulties of acquiring language through the eye along which it takes the hearing teacher years to acquire, if he acquires it at all...(the Deaf child) can easily see the possibilities of his own development and is thereby encouraged to effort and prevented from being quickly discouraged by failure..." (1898)

[below from Kelly Stevens (1923)]:

John Burton Hotchkiss learned in its purity the language of signs, the heritage of the Hartford School from France, as taught at the School by Laurent Clerc. This language he in turn bequeathed to generation after generation of students who flocked to Gallaudet. These signs, correct in etymology and sanctioned by tradition, the pupils of the Doctor took with them to give pleasure and profit to themselves and the deaf among whom they worked. Thus every gathering place of the Deaf in America felt Dr. Hotchkiss' teaching.

DR. JOHN BURTON HOTCHKISS

BY MRS. F. A. ANDREWJESKI

*Happy, cheerful, loyal, man,
Built upon the Godlike plan,
Always doing something good,
For his human brotherhood;
Memory, with her magic spell
O'er the years shall fondly tell
How his glorious active mind
Loved and wrought for all mankind.*

These lines so aptly describe the life and character of our late departed John Burton Hotchkiss, and express the esteem in which we hold him. We think they should be carved on his tombstone, and committed to memory by all who love him, and by his friends who may pass by his grave.

But, who among the hundreds he has taught can say they do not love him and revere his memory? Who among them can say he did not, at one time or other, do some kindly service? His position among the deaf is indeed unique—a most respected counselor, a greatly beloved friend, and a highly honored teacher—what a title for any man!
